

I Excel at Breeding Rabbits

Dakota Wilson, Grade 7
Brookville Middle School

I had a buck and a doe and I was wanting to breed them so that I could sell the rabbits to make money to buy their feed. Then I used some of that money to buy different breeds of rabbits and began selling those rabbits to make more money. I haven't been able to save any of my money because I keep reinvesting it in my rabbit business. Now I have 20-30 rabbits that I breed for selling. I have a lot of repeat customers that buy my rabbits. I have showed some of my rabbits at the Franklin County 4H Fair over the years and had some 1st place finishes. I also raise goats and chickens.
